Technical Assignment Task:
Build a simple application which provides web services to facilitate group chat and manage data.

Admin APIs (only admin can add users)
- Manage Users (create user, edit user)

Any User (normal user, admin user) –
Authentication APIs (login, logout)

Groups (Normal User) –
Manage groups (create, delete, search and add members, etc). All users are visible to all users.

Group Messages (Normal User)
 - Send messages in group
- Likes message, etc

Build simple e2e functional tests with python/nodejs to prove APIs are
working.
Requirements
 – Use database of your choice

Instructions:
1. Duration of the task: 7 days.
2. Please submit your code to GitHub and share the link to Sunayana Eknath, HR Manager to her email address sunayana@riktamtech.com.
3. If you have any queries or need clarification feel free to call our HR Manager on 8106108522.
